NEWS!

Cool thing: VBR Playground at the legendary F.A.T. ICE RACE in Zell am See

Hello VBR fans,

We are currently gearing up for something incredible: our participation in the legendary F.A.T. ICE RACE in Zell am See, on January 27th. The F.A.T. Ice Race is a festival of extreme driving and sporting precision. And VBR Playground is hitting the ice to provide all guests with a completely new and unique perspective on the race.

We are recreating the F.A.T. ICE RACE track as a VBR-Playground. Two brand-new VBR buggies are ready to drift on the ice - controlled from the movable seats of our VBR simulators, with latency close to zero. This ensures a pure racing experience! Our VBR vision is experientiable on-site: the evolution of motorsports based on our teleoperation technology - Gaming 3.0.

And here's something more: Our VBR team is currently working at full throttle to make the VBR Playground available soon. So stay tuned and be part of the journey into the future of motorsports.

Sporty regards,

Paul, Philipp & Thomas
Founders of VBR Innovations

About VBR Innovations

VBR Innovations is a future-tech company from Austria that develops teleoperation technology for entertainment and industry, aiming to set new standards. The technology was developed through years of research and continually improved through over 100 tests at the VBR Playground. The startup has three business divisions: VBR Playground, VBR Pilot, and VBR Sim. Their shared vision is a world where new technologies are used to create a better life for people, the environment, and businesses.
