

**Take Your Business
to the Fast Lane!**

**with the
VBR Ready-to-Race
Simulator!**

Hard to get: the real deal!

Access to high-end simulators was once reserved for the chosen few.

To own such a simulator, you practically had to be a professional racer and an IT expert at the same time. This meant that, until now, only professional racing teams and passionate gamers could fully harness the potential of this technology. For millions of PS enthusiasts, thrill-seekers, and racing fans, the dream of experiencing such an adventure seemed unattainable.

Race for Real.

We firmly believe that true racing excitement should be accessible to everyone.

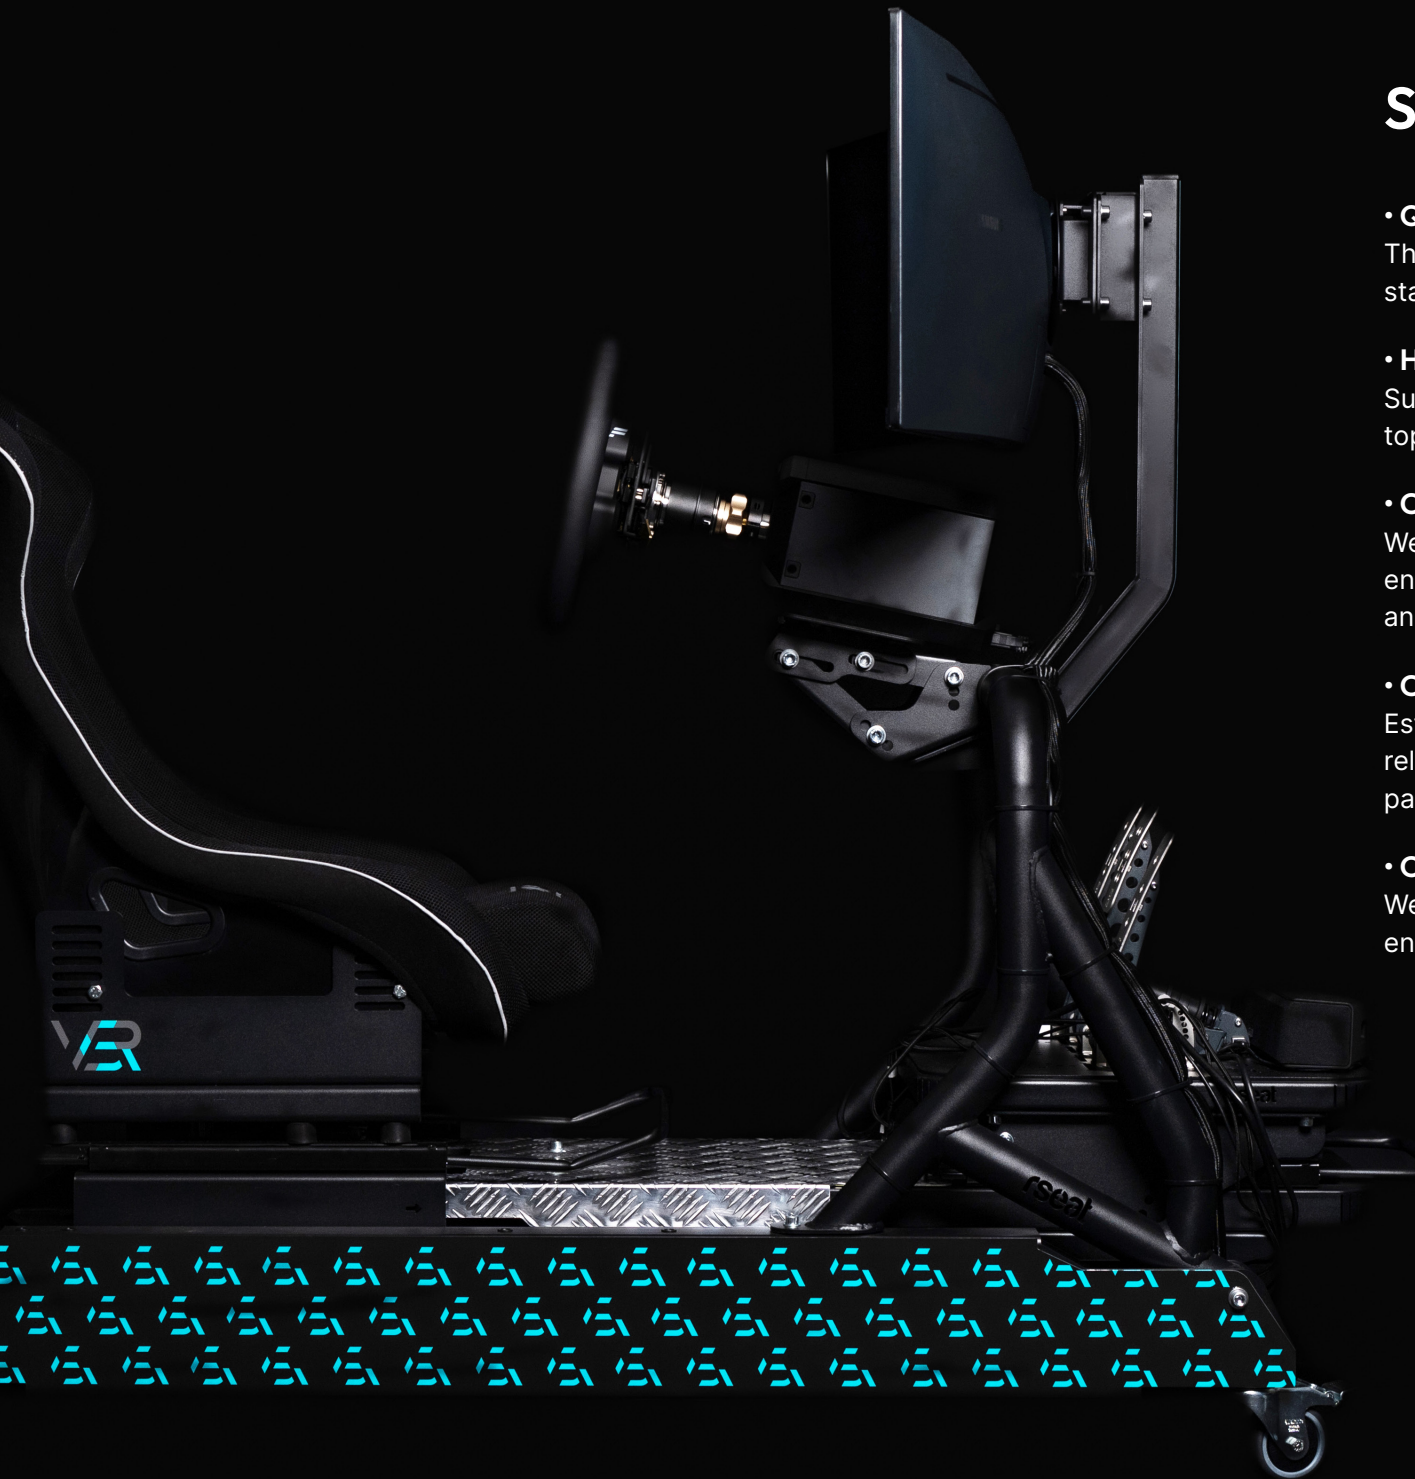

That's why we've developed the VBR SIM to make this experience available to a wider audience. Our mission? To give businesses the opportunity to offer their customers and employees an unforgettable racing experience.

With VBR SIM, the possibilities are endless:

From individual races to hosting your own championship...

with live commentators, qualification races, and real competition - the VBR SIM offers you a wide range of options. It's the perfect choice for team-building and exceptional customer engagement. The best part: we handle the entire process, allowing you to fully focus on the experience.

Sim-sational benefits:

- **Quick setup and easy maintenance:**

Thanks to our Ready-to-Race concept, you can start right away and focus on what matters most.

- **High-end racing for your audience:**

Surprise your target audience with a top-notch racing experience that will thrill them.

- **Custom design:**

We tailor the VBR SIM to your specific needs, ensuring it perfectly aligns with your brand and event.

- **Create your own racing series:**

Establish your own racing series for long-term customer relationships and strengthen your bonds with clients and partners.

- **Outstanding VBR full-service:**

We take care of the entire process, enabling you to concentrate on the racing experience.

Perfect match for:

Hotels, Shopping
Center

Motorsport and Go
Kart Tracks

Funpark

Events

Fairs, Shows and
Exhibitions

Join the Playground

The VBR Sim is already 100% compatible with our VBR Playground, the world's first teleoperated racing system.

This means that from our simulator, you can control our VBR Electric Cars, race on real tracks, and compete with racers from around the world.

The Playground Extension is expected to be released in 2025, and as a user of our simulator, you will have the pole position and exclusive access!
